

Instructions for Serial Numbers Template File Completion

This is a description of the steps required for the definition of the materials in the specific excel file.

The information is divided into 2 major areas:

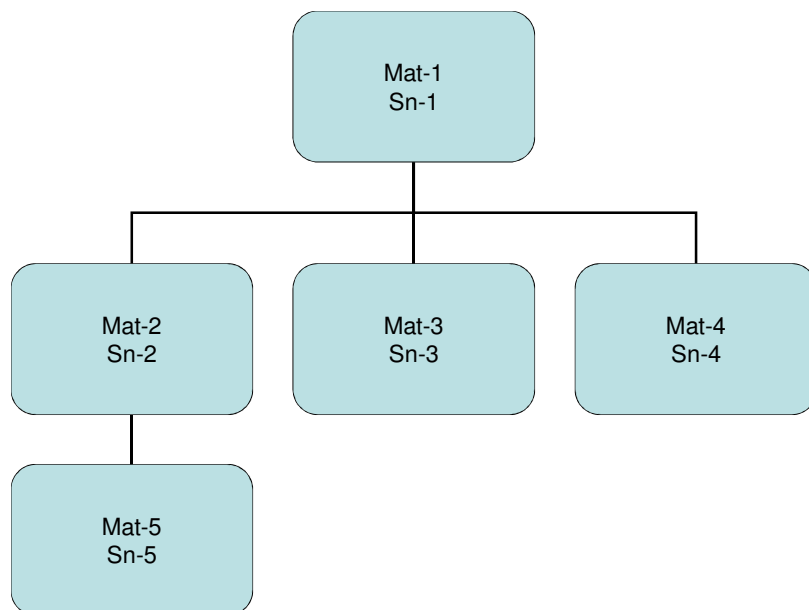

- The **PARENT** serial number (SN) information (“*Superord. Material Number*” and “*Superord. Serial Number*”) and
- The **CHILD** SN information (“*Subord. Material Number*” and “*Subord Serial Number*”).

The columns **A** and **B** contain the PARENT SN information while columns **C** and **D** the CHILD information.

However, an exception occurs on every new PARENT SN definition. The PARENT information should also be defined in the CHILD area of the line (blue lines).

A	B	C	D	Comment
Superord. Material Number	Superord. Serial Number	Subord. Material Number	Subord. Serial Number	
Mat-1	Sn-1	Mat-1	Sn-1	Parent
Mat-1	Sn-1	Mat-2	Sn-2	Child
Mat-1	Sn-1	Mat-3	Sn-3	Child
Mat-1	Sn-1	Mat-4	Sn-4	Child
Mat-2	Sn-2	Mat-2	Sn-2	Parent
Mat-2	Sn-2	Mat-5	Sn-5	Child

The same information represented by a tree view for a better understanding of the logic behind the definition of SNs.

See below an example:

A	B	C	D
Superord. Material Number	Superord. Serial Number	Subord. Material Number	Subord. Serial Number
Z00-407/03.3106	321106375716	Z00-407/03.3106	321106375716
Z00-407/03.3106	321106375716	Y00-40K/12.31	321103327579
Z00-407/03.3106	321106375716	Y00-40K/02.31	321105349908
Z00-407/03.3106	321106375716	Y00-40J/92.31	321106361597
Y00-40J/92.31	321106361597	Y00-40J/92.31	321106361597
Y00-40J/92.31	321106361597	Y00-90K/19.39	320987654321
Y00-40J/92.31	321106361597	Y00-40J/90.31	320987654555

In addition, a set of extra information is required, such as **Description**, **Software Version** and **NMS Version** which are mandatory for every SN (columns E, J and K in excel file).

Please note that the proper supplement of the excel file is significant for the correct loading of SNs into the system.
